<b>PERSONAL CARE - EYE SWABBING</b>			
Version 3i    Last Up-dated: 01 August 2002    © GMP Systems, Year 2002			

- 5.10 Swab the upper lid by slightly opening the lid margin and asking the resident to look down. Swab from the nasal corner outwards and use a new swab each time until all discharge has been removed.
- 5.11 Swab with a dry swab.
- 5.12 Once both eyelids have been cleansed and dried, make the resident comfortable.
- 5.13 Remove and dispose of equipment.
- 5.14 Wash and dry your hands.
- 5.15 Record the procedure in the appropriate documents.
